DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a product, classified in class 229, subclass 162.3.
 - II. Claims 15-19, drawn to a method of using the product, classified in class 206, subclass 326.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process. For example, the carton/blank for forming the carton of claims 1-14 could be used in a process where the carton is loaded with any article(s), e.g. a riding lawnmower, a stack of trays with a plurality of contents on each tray, a toaster, a plurality of toasters, a stapler, or any other mercantile product(s) as opposed to claims 15-19 which require the specific step of placing a cabinet within a carton. Also, the carton/blank for forming the carton of claims 1-14 could be used by transporting the box/blank in a collapsed condition to a retail outlet and subsequently loading the carton with a cabinet, e.g. a used cabinet for sale, i.e. selling/transporting a display box/blank for use with an old/existing cabinet at a retailer as opposed to claims 15-19 which require the step of transporting the carton with a cabinet unit therein.

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
